This memo is to inform you that the compounds listed below were not able to be validated by USDA's Pesticide Data Program (PDP) and were not/will not be analyzed in mangoes during the timeframe of October 2017 through September 2018. These compounds have established U.S. tolerances for mangoes but did not recover through the QuEChERS Multiresidue Method (MRM) employed by the Texas Department of Agriculture.

Avermectin  
DDT (o,p', p,p')  
Cyromazine  
Endothall  
EPN  
Ferbam  
Glyphosate

Magnesium Phosphide  
Mancozeb  
Oxychlorane  
Paraquat  
Phosphine  
Pyrethrins

Please contact the Monitoring Programs Division at (202) 572-8167 with any questions or comments.
